Educating & Informing Stakeholders on Energy,  
Environment, and Thermal Power Plants

*April 2020*

***Welcome to the St(o)ppwatch newsletter! This is our monthly dispatch of updates and insights on issues surrounding coal-based power plants, air pollution, climate change, and the environment in general.***

---

## **Send your comments on EIA Draft Notification 2020**

As India battles the **COVID-19 outbreak**, the Ministry of Environment, Forests and Climate Change (MoEFCC) has released the draft Environmental Impact Assessment Notification (EIA) 2020.

From excluding new industries that should have environmental clearance to reducing the number of public consultations, the draft EIA 2020 notification goes **against** the need of the hour to **strengthen environmental laws**. For such an important notification that has far-reaching impacts on India's environment and forest protection, the ministry opened it up for **public comments** right in the midst of this **pandemic**.

This move is not only **ill-timed** but also **wrong! Send this email** (before May 22) demanding that the notification be **scrapped immediately**. We're counting on you.

### **Two die after dyke of Reliance power plant's fly ash pond breaches in Madhya Pradesh**

An act of negligence by Reliance's Sasan Ultra Mega Power Project (UMPP) in Singrauli Power had led to breach of their fly ash dyke, a third such incidence in a region populated with power plants.

## Effect of restricted emissions during COVID-19 on air quality in India

As described in this paper, lockdown and restrictions in industrial and human activities due to the COVID-19 pandemic has led to decrease in the levels of PM<sub>2.5</sub>, PM<sub>10</sub>, CO, and NO<sub>2</sub> in India. This suggests strict execution of air quality control plans could lead to improved air quality in India.

New analysis by Carbon Brief shows that young children (those born in or after 2017) must emit eight times less CO<sub>2</sub> than their grandparents to limit global temperature rise to 1.5°C (blue bars) or 2°C (red bars). The bars in the graph represent lifetime carbon budget for each generation starting 1900 to 2017.

### About CAG:

Citizen consumer and civic Action Group (CAG) is a non-profit, non-political, professional organization working towards citizen's rights in consumer and environmental issues and promoting good governance including transparency, accountability, and participatory decision-making.

### About Thermal Watch:

An initiative to assist local communities around existing and proposed coal-fired power plants on the Environmental Impact Assessment (EIA) process, by developing and disseminating information toolkits that they can use. In addition to that, we create awareness about the existing compliance processes to push for better compliance by power plants to prescribed environmental standards.
